## Summary

Aspiring Software Engineer | Problem Solver | Tech Enthusiast

I am a passionate Computer Science student with expertise in C, C++, DSA, Java, Python, JavaScript, and Web Development (HTML/CSS). With a strong foundation in Data Structures & Algorithms, I actively solve DSA problems and build real-world projects to enhance my skills.

What I Bring to the Table:

✓# Strong Problem-Solving Skills – 200+ DSA questions solved on LeetCode.

✓# Full-Stack Development – Built projects like Amazon, Salesforce, and Spotify clones.

✓# Passion for Learning – Always exploring new technologies and trends in software development.

Looking for Opportunities!

I am actively seeking internships and collaborations in Software Development, Web Development, and Backend Engineering. Let's connect and grow together!

Let's Connect! – I'd love to network with fellow developers, recruiters, and tech enthusiasts.

---

## Experience

Self-employed

DSA Problem Solving (LeetCode & Competitive Coding)

February 2025 - Present (1 month)

India

## Projects

### 1. E-Waste Management Website

A full-stack responsive web application focused on electronic waste management, recycling, and education. Provides resources and services for responsible e-waste disposal.

Tech Stack: HTML, CSS, JavaScript, Node.js (Backend)

GitHub: <https://github.com/Sanesh764/E-com>

### 2. Weather Forecast Application

A full-stack web app that delivers real-time weather updates using public APIs with backend integration.

Tech Stack: HTML, CSS, JavaScript, Node.js

GitHub: <https://github.com/Sanesh764/weatherforecast>

### 3. AI Chatbot

A conversational AI chatbot with backend logic for handling dynamic responses and user inputs.

Tech Stack: JavaScript, Node.js

GitHub: <https://github.com/Sanesh764/AiChatboat>

### 4. Amazon Clone, Salesforce Clone, Spotify Music App (25 songs)

Developed real-world web app clones for improving UI/UX and development skills.

Tech Stack: HTML, CSS, JavaScript

## Additional Highlights

- 200+ LeetCode DSA questions solved (Strong in Binary Search, Two Pointers, Recursion, DP)
- Languages: C, C++ (Expert), Java (Intermediate), Python (Basic), JavaScript (Frontend + Backend)
- Actively exploring Web Dev, Backend Engineering & Full-Stack roles
- Excellent Communicator | Team Player | Fast Learner | Tech Enthusiast

Solved 200+ LeetCode DSA problems in C++

Strong in Two Pointers, Binary Search, Recursion, and Dynamic Programming

Active participant in online coding competitions

Self-employed

Web Development Projects (Self-Initiated)

January 2025 - Present (2 months)

India

Built multiple projects showcasing web development skills:
